

# Construction Management & Operation during COVID-19 in Northern BC, let's check-in:

## CHBA Lunch and Learn

### Members only

**Date:** Thursday, May 14, 2020

**Time:** Noon - 1:00 PM

**Webinar Format, FREE**

*One (1) CPD credit is pending approval by BC Housing*

### **\*Pre-registration is required please\***

**Register via email:** [eo@chbanorthernbc.ca](mailto:eo@chbanorthernbc.ca)

*-Provide your name, the company preferred email and phone number*

*-Log-in instructions and link will be shared with each registrant prior to the webinar*

## **OVERVIEW:**

### **Construction Management and Supervision:**

Workplace party responsibilities - owners, managers, supervisors, workers and prime contractors according to Work Compensation Act and Regulation. What does due diligence look like? Outline of requirements to provide diligence in the workplace

### **Planning Management and Administration:**

What is required for you to keep going during the current "State of Emergency"- providing resources and links.

What does it mean when a worker refuses to return to work because of COVID- 19 concerns? Discussion around Worker's Right to Refuse, the steps required by all workplace parties and the final decision is one made by WorkSafe BC

What will the "New" requirements be? Because of the dynamics of the situation this will be more of a brainstorm/ discussion session providing ideas not providing any directives or requirements just getting the companies thinking about it.

**Host:** Art Reynolds COHS, NCSO

Art has worked as a tradesperson for 20 plus years moving to safety in 2004, holding numerous positions within the safety industry from boots on the ground safety advisor to corporate safety management. In 2010, Art started a safety consulting business providing training and safety advice to the construction industry. Since 2014 the main business focus has been auditing safety programs and providing services to the BCCSA as the Northern Regional Safety Advisor assisting companies throughout Northern British Columbia with safety management system development, training and developing practical solutions for company's safety needs.
