

# Improving Air Tightness

**Date:** Friday September 20, 2019

**Time:**

7:30am: Breakfast

8:00am: Seminar

Noon: Lunch

5:00pm: Seminar ends

**Venue:** Sandman Signature Hotel (Great Room)  
2990 Recplace Dr, Prince George, BC V2N 0B2

**Cost:**

CHBA Members: \$100+GST

Non Members: \$175+GST

- The CPDs are now approved for 8 CPDs by BC Housing

**Description:**

This hands-on workshop provides the attendees with a holistic perspective of the overall satisfactory performance of the building envelope as far as airtightness is concerned. Supported by a wide range of mobile building envelope assemblies, the workshop will showcase various methods of improving air the tightness of wood, concrete, and steel-framed buildings. Furthermore, it demonstrates how the presented methods will have an impact on moisture management, energy efficiency, and thermal comfort. In addition, all presented air barrier methods will be explored and reviewed in relation to long-term durability, adaptability to future repair and renovation. With the focus on delivering hands-on and interactive learning, this workshop will prepare the industry for the adoption of BC Energy Step Code.

**Workshop Format:**

A highly interactive and collaborative format will be implemented in this hands-on workshop with the goal to make the session as rewarding as possible. Various brainstorming sessions

and group works will be incorporated, with the goal to create vibrant and energetic sessions in the support of the learning experience of the attendees. The workshop will be supported by around twenty mobile assemblies as well as a wide range of air barrier products and systems. In addition, an intuitive and easy to follow PowerPoint presentation will be developed, showcasing various interesting case studies, photographs, and a wide range of 3D drawings specifically tailored for this workshop.
