**Certificates of attendance will be emailed post-webinar*

ABOUT THE PRESENTER:

MARK LESLIE – Regional Manager Concrete Division, BC North, Terus Construction

Mark began his career with Coquitlam Concrete in 1991, driving a mixer, batching and selling concrete. After 14 years, he joined the commercial sales team for Lafarge Construction Material and was a part of building some of Vancouver's landmark projects, including the Port Mann Bridge and the Sea-to-Sky Highway. In 2011, Mark joined Terus Construction, a Division of Colas Group, where he now puts his experience to work optimizing operating systems and processes for over 45 ready-mix plants across Canada.

In January 2020 Mark moved to Prince George to oversee concrete operations in BC North. A committed volunteer, Mark has served on the Board of Directors for Concrete BC since 2014, and is the current Past Chairman of the Executive Board.

When he's not working, you can find Mark, exploring the wilds of British Columbia on two and four wheels, from his home base in Prince George, BC.
